FREE FOR YOUR WEBSITE · NO SIGN-UP

Add live Indian vehicle-sales data to your site in 2 minutes

Flash Finance widgets show India's vehicle registrations from Vahan (MoRTH) and update themselves every day. Copy two lines of code, paste them into your page, and you're done.

EV registrations | Electric two-wheelers | Market Pulse | FII / DII | Market breadth

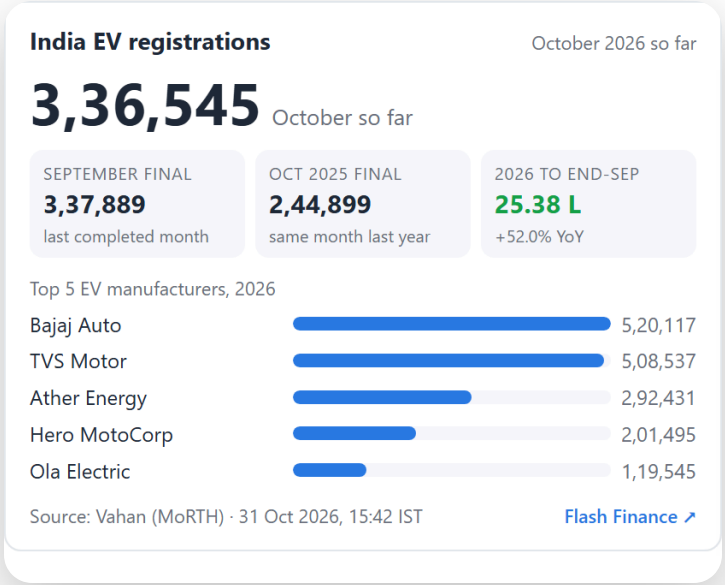

Flash Finance Desk

flashfinance.news/embed

CHOOSE A WIDGET

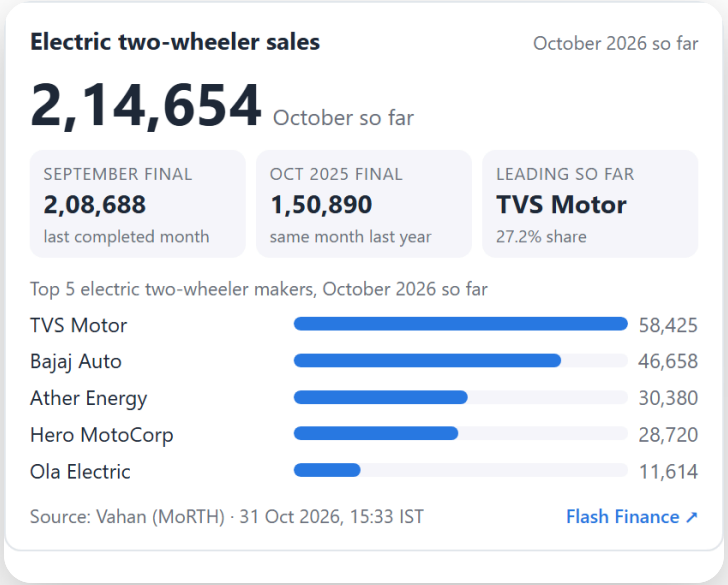

Pick the data your readers follow

EV registrations

`flashfinance.news/embed/ev-sales`

All electric vehicles this month, last month, last year and the top makers.

Electric two-wheelers

`flashfinance.news/embed/electric-two-wheelers`

Electric scooters and motorcycles, with the leading brands.

Market Pulse

`flashfinance.news/embed/market-pulse`

A 0-100 health score for the Indian market. FII/DII and breadth widgets too.

1 Copy the code

Go to **flashfinance.news/embed** and press **Copy code** under the widget you want, or copy these two lines (the EV widget):

```
<iframe src="https://flashfinance.news/embed/ev-sales" width="100%" height="340" style="border:0;
max-width:420px" loading="lazy" title="EV registrations — Flash Finance"></iframe>
<p style="font:12px sans-serif;margin:4px 0 0">India EV sales data by <a href="https://flashfinan
ce.news/vahan/ev-sales-india">Flash Finance</a></p>
```

> For another widget, change only the address after **/embed/**: **electric-two-wheelers**, **market-pulse**, **fii-dii** or **market-breadth**. Please keep the small credit line under the widget.

2 Paste it where your site accepts HTML

WordPress	In the post or page editor click **+**, choose **Custom HTML**, paste, then **Update**. For a sidebar: **Appearance** → **Widgets** → **Custom HTML**.
Blogger	**Layout** → **Add a Gadget** → **HTML/JavaScript**, paste, **Save**. Inside a post: switch to **HTML view** and paste.
Wix	**Add Elements (+)** → **Embed Code** → **Embed HTML**, paste, then size the box to about 420 × 340.
Google Sites	**Insert** → **Embed** → **Embed code**, paste, **Next**, **Insert**.
Ghost	Click **+**, choose the **HTML** card, paste.
Any other site	Paste it into the page's HTML where the widget should appear.

3 Publish. That's it.

The numbers refresh by themselves every day. You never need to change the code again.

Dark website?

Add **?theme=dark** to the widget address:
`…/embed/ev-sales?theme=dark`

Narrow sidebar?

If the space is under 340 px wide, change **height="340"** to **height="440"**.

Substack, Medium or LinkedIn?

They don't allow live widgets. Every Vahan report has a chart image you can post instead, with a link back to the report.

Where the numbers come from

Vahan registration data (MoRTH), with the update time printed on every widget. Registrations, not factory dispatches.

WANT ANOTHER REPORT ON YOUR WEBSITE?

We can turn any of our reports into a widget for you

- Any state: Kerala, Tamil Nadu, Maharashtra, Uttar Pradesh and every other state and UT
- Any maker: Maruti Suzuki, Tata Motors, Mahindra, TVS, Bajaj, Ather, Hero and others
- Any segment: cars, two-wheelers, tractors, commercial vehicles, e-buses, e-trucks, CNG, hybrids
- Market data: FII/DII flows, market breadth, results calendar, Market Pulse
